<title>Insert title here</title>

</head>

<body>

<center><form action ="Add" method="POST">

<h1>enter two number</h1>

<strong>Enter 1st number:</strong><br>

<input type="number" name="num1"><br>

<strong>Enter 2nd number:</strong><br>

<input type="number" name="num2"><br>

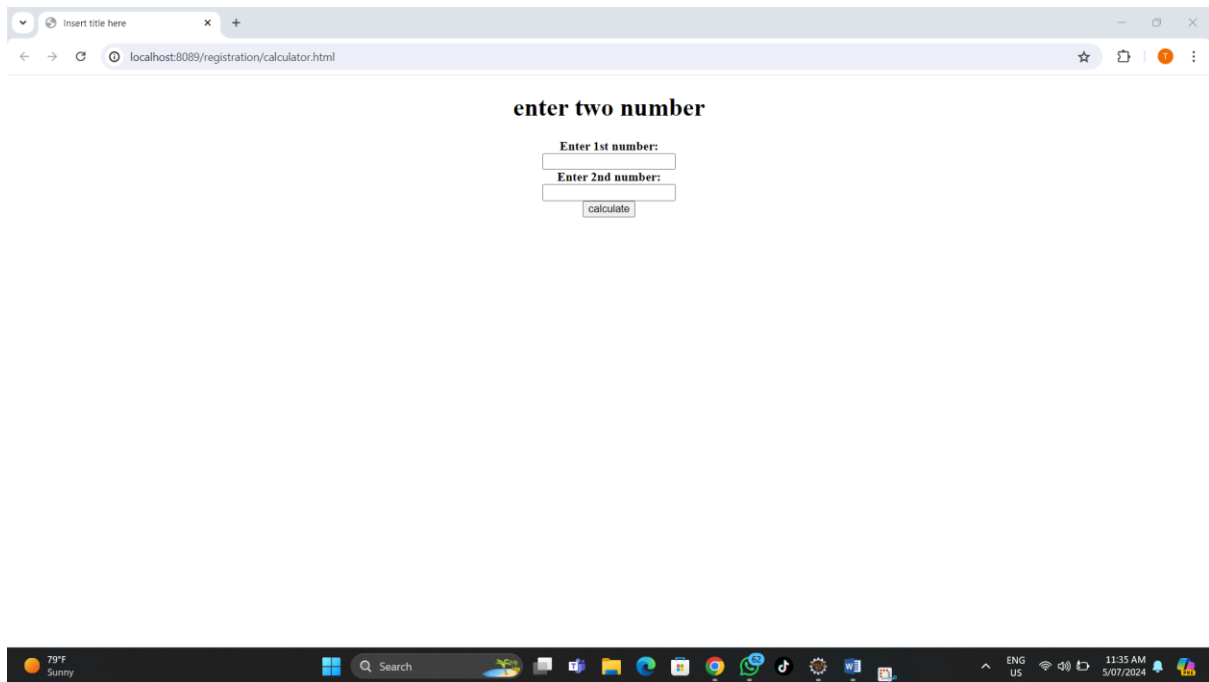

<input type ="submit" value="calculate">

</form>

</body>

</html>
```

### OUTPUT

### SERVLET CODE

```
import java.io.IOException;
import java.io.PrintWriter;
import javax.servlet.ServletException;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;

@WebServlet("/Add")
public class Add extends HttpServlet {
    private static final long serialVersionUID = 1L;

    public Add() {
        super();
    }

    protected void doGet(HttpServletRequest request, HttpServletResponse response) throws
ServletException, IOException {
```

```

        response.getWriter().append("Served at: ").append(request.getContextPath());
    }

```

protected void doPost(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException {

```

    int i = Integer.parseInt(request.getParameter("num1"));
    int j = Integer.parseInt(request.getParameter("num2"));
    int a = i + j;
    int d = i/j;
    int m = i*j;
    int s = i-j;
    PrintWriter out = response.getWriter();
    out.println("<html><head><title>Registration Form </title></head><body>");
    out.println("<center><u><h1>final Result</h1></u>");
    out.println("<strong> num1 + num2 : Result is " + a + "<strong><br>");
    out.println("<strong> num1 / num2: Result is " + d + "<strong><br>");
    out.println("<strong> num1 * num2: Result is " + m + "<strong><br>");
    out.println("<strong> num1 - num2: Result is " + s + "<strong><br>");
    out.println("</body></html>");

```

```

    }

```

```

}

```

### FINAL RESULT

**enter two number**

Enter 1st number:

9

Enter 2nd number:

3

calculate

**FINAL RESULT OF INPUT NUMBER:**

**final Result**

num1 + num2: Result is 12

num1 / num2: Result is 3

num1 \* num2: Result is 27

num1 - num2: Result is 6
